

RelWare raises money for TEAM FOX with DeLorean Time Machine at the 2011 HIMSS Conference

For Immediate Release

Farmington Hills, Michigan – March 7, 2011 – Reliance Software Systems, Inc. (RelWare), a Michigan-based healthcare information technology company, raised greater than \$1000 for TEAM FOX during the recent 2011 HIMSS Conference and Exhibition in Orlando, FL. This contribution directly benefits the Michael J. Fox Foundation for Parkinson's Research.

For the second year in a row, RelWare featured the *Back to the Future* DeLorean Time Machine in its booth to raise awareness for TEAM FOX, and as a symbol of RelWare's technology—a "Roadmap to the Future". For a personal picture with the Time Machine, attendees were asked to make a donation of any amount to TEAM FOX.

Dann R. Lemerand, FHIMSS, RelWare's vice president of marketing and business development said, "We are honored to be able to raise money during the HIMSS conference for the Michael J. Fox Foundation. Having the *Back to the Future* Time Machine in our booth has been a great draw for us to talk about our technology and as a way to raise awareness for the Foundation."

About Team Fox

Team Fox was launched in January 2006 as a way for The Michael J. Fox Foundation to support the heroes all over the country who already had made it their personal mission to find uniquely creative and fun ways to raise funds for Parkinson's research. Team Fox provides guidance, tools and resources for the thousands of amazing people all over the world who are walking, running, baking, party planning, paddling, pedaling, and dancing to raise funds and awareness for Parkinson's research.

About RelWare

Since 1998, RelWare's corporate goals have been to provide a quality-driven, reliable, affordable, web-based EHR to healthcare. A focus of the product is incorporating thin technology with emphasis on usability and flexibility in workflow to meet the individual needs of every user. RelWare makes the difference through advanced, consistent software solutions and successful, implementation-driven service. RelWare and EXR: it's what you want.
